TRIBUNAL DE CONTAS DA UNIÃO

Are we prepared for open and digital government?

Msc. Marcio Rodrigo Braz, CISA
Department of External Control of IT (SEFTI)

2013 Protests

People want...

- Transparency
- Better public services
- Eliminate corruption and waste
- Efficiency
- Less burocracy
- To be heard

Government needs to be more open
but also more digital

Open Government Partnership

Founders, 2011

Brazil
Indonesia
Mexico
Norway
Philippines
South Africa
United Kingdom
USA

Today: 69 countries – 2250 commitments to be more accountable and open

Since open government and data openness are now a **public policy** in Brazil and an **international commitment**, we have started a series of audits to **evaluate government actions** and to **induce improvements**

Last year government representatives from France, UK, Australia, South Korea, European Union, Estonia, Singapour, USA, Holand, Turkey participated of a seminar lead by TCU to share experiences on Digital Government

Our experience on **data openness auditing** was described in an article in the 21/2015 edition of the **Eurosai Magazine**

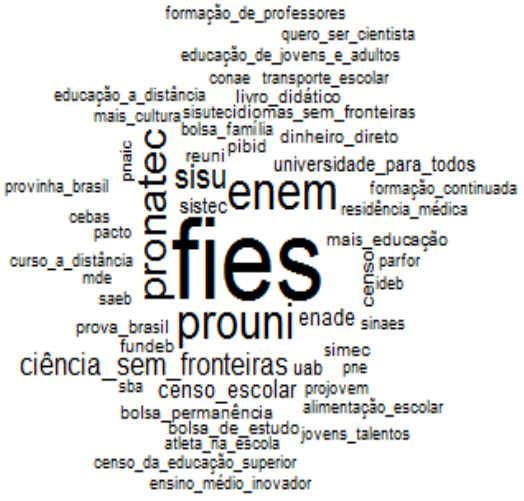
Open data
Open gov

Open data @Education



Audits

Data openness Strategy

Digital Services

Where should we go from here?

Many SAIs in the WGITA community have experiences to share!!!

Proposal

To establish a **subgroup** in WGITA to discuss trends in **Digital Government** and to **share information and experiencies** about:

Open data strategies;

Public services redesign

E-Participation

New procurement models (cloud computing);

Why a subgroup?

- No deadlines, no preliminary commitments (It's not a project)
- Mailing list for discussions
- Sharing of documents, online events
- Strenghten a network of auditors
- Nurture bilateral cooperation

TRIBUNAL DE CONTAS DA UNIÃO

Thank you!
