climate scanner

rapid review tool for climate action

useful and feasible for every SAI
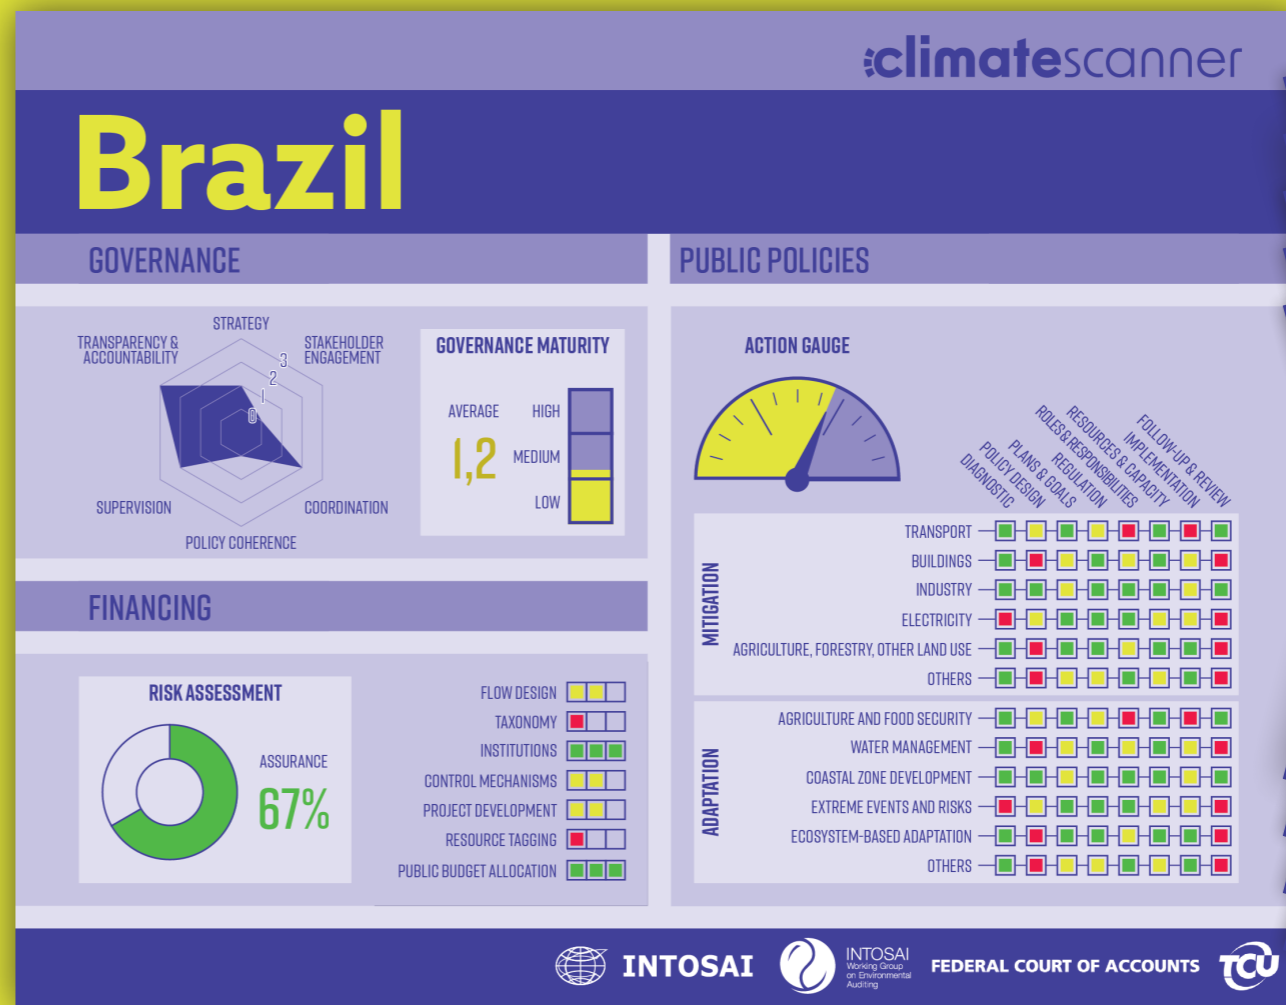

NATIONAL

GLOBAL

BUILT BY SAIs

ClimateScanner will be designed and tested by SAIs in 2023 and made available for use in 2024.

---

national reviews

ClimateScanner will allow SAIs to carry out a broad national scan of their governments' action for climate, useful as input for future works or to address topics not yet covered.
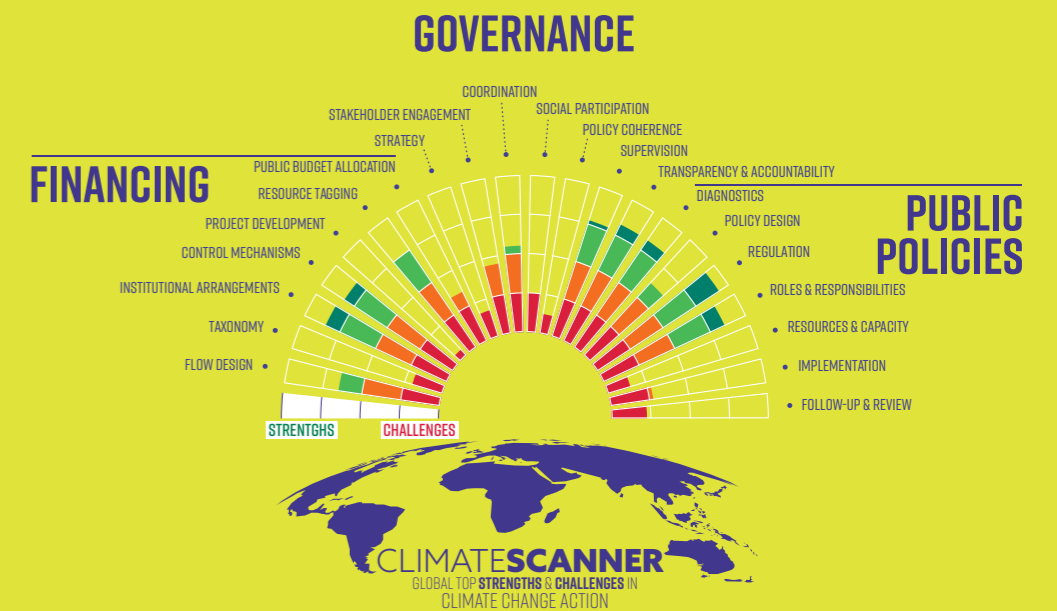

strengths & challenges

Data collected in national scans will point main national strengths and challenges related to climate action.
